Description

maiwell Premium Glitter Gel anGELic Dark Orange (P182) - Fiery shine for irresistible nails

Dip your nails in the warm shimmer of **maiwell Premium Glittergel anGELic Dark Orange (P182)**. This exquisite colour is reminiscent of molten copper with a hint of fiery red and catches the light at every angle. As you can see in the picture, countless fine glitter particles sparkle in the texture, creating a glamorous, three-dimensional effect that draws all eyes to your hands.

The anGELic Dark Orange is more than just an eye-catcher. It combines radiant colour with professional quality:

- **High pigmentation:** Just one coat is enough for an opaque and colour-intensive result - exactly as shown in the picture.
- **Long-lasting shine:** The colour remains brilliant and vibrant even after days, without fading or losing its luminosity.
- **No settling:** The innovative formula prevents the glitter particles from settling. No need to shake or stir before application.
