Product summary

Important part of every nail modeling!

Description

Alcohol Isopropanol 80% Clear 5 liters

For the best possible liability of the gel paint and a long-lasting result, you are on our way with our cleaner.

With the Isopropanol cleaner in 80%, all oily residues, as well as dirt from the art and natural nail can be

eliminated before the nail model layer. Before the nail modeling, the cleaner ensures the natural nail for the degrease of the nail and during the modeling for removing the sweat layer after curing of the UV gel.

Other features of the cleaner are that it serves to remove model storage residues or remove failed nail art.

The use of the cleaner is child's light: give some liquid to a cell tap and then wipe over the nail. The cleaner contains no additional dyes, works thoroughly, quickly and reliably without the surface to damage the nails.

- content: 5 liters equals 1.32 gallons

Note : For stronger or more aggressive gels, use alcohol in a higher intensity (99%).
The standard product recommends alcohol in 70% of resolution.

Use biocidal products carefully. Always read label and product information before use!

Technical details & prices

Item number	FL9510
