Product summary

The new premium class!

Description

Discover a specially designed lounge massage chair. Our top model combines the latest, intelligent 3D massage technology with exclusive design and high-quality materials. With a super accurate body scan and 24 automatic programs, the VOYAGER offers a premium class massage experience. The new copper motors are also whisper-quiet and durable.

State-of-the-art technology that soothes - the professional massage chair
In addition to the obligatory head-to-foot body scan, the luxurious range of functions includes an extra-intense shoulder massage, Thai foot reflexology with rollers and 18 air cushions, and the L-Shape Radius massage with extra depth. A hot tip not only for winter: the leg heating is also unique in the luxury class. Also not to be sneezed at is the heating for the back (up to a maximum of 50° possible!). The high-quality carbon fiber infrared heating provides soothing warmth in the back area, loosening your muscles and relieving tension.
The massage chair can also be moved into the so-called zero gravity position. This body position, where the legs are slightly above the heart, is the position that the body naturally assumes in zero gravity. This means that the legs are elevated, the thighs as well as the upper body form a 127 degree angle and thus assume the best possible inclination for relaxation.
The roller technology of the Voyager luxury massage chair massages you almost like a traditional massage with your hands.

Sounds good? Sounds excellent!
Your massage break is topped off with your very own individual audio, which you enjoy via Bluetooth speakers, as well as state-of-the-art technology such as voice control, quick-start operation and LED lighting. Warning. You won't want to leave our VOYAGER massage chair. As with all of our massage chairs, delivery is free of charge via a shipping company as standard. Do you want the chair to be brought to your desired place and assembled? We offer this all-round carefree delivery on request. Maiwell also offers you the possibility to try out the massage chair "Voyager". You are welcome to test the massage chair on site in our store in Oldenburg.

- Latest intelligent 3 D massage technology with L-Shape radius for a full body massage up to the thighs
- Conveniently operated by voice, the quick start control or the LCD smart touch screen
- Premium body scanning technology - Before the massage, your body is measured and your shoulder height is detected. For your optimal and very personal massage
- Intelligent foot and leg massage by recognizing the inclination of the leg support
- 24 different automatic programs
- Back heating and leg heating made of carbon fibers
