|                         | <b>View product online</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|                         | <p>Tau den Gl. Ihren Acrylpinsel für kurze Zeit in Modellierflüssigkeit, anschließend den Pinsel am Rand ansetzen. Sie mit der Pinselspitze das Function Acrylpulver auf und beginnen mit dem Auftragen auf die Nägel. Das Acrylpulver muss feucht verarbeitet werden. Mit einer drehenden Bewegung eine kleine Kugel formen. Die Kugel sofort auf die Nagelspitze setzen und zerfließen lassen, erst nachdem das Acryl verlaufen ist, es mit dem Pinsel zu jeder Seite hin flach drücken. Die Modellage von der Spitze hin zum hinteren Nagelrand arbeiten, dabei darauf achten, dass die Ränder dünn</p> |
