

Nail miller URAWA Super UP200 (without spare carbon brush)

Product Information

Product summary

Professional quality from the house of URAWA!

Description

URAWA Super UP200: Powerful nail miller for professional results

The **URAWA Super UP200** is a high-quality nail miller for professional nail salons and demanding users. With infinitely variable speed control up to 25,000 revolutions per minute, it offers the necessary power for precise work on natural and artificial nails.

What characterises the URAWA Super UP200:

- **Powerful and quiet:** The powerful SUG12 micromotor made of durable stainless steel with a sealed bearing guarantees quiet and low-vibration operation - even at high speeds. This means your hands won't get tired even after prolonged use.
- **Precise and controlled:** The outstanding centring of the rotation enables precise work without disturbing vibrations of the milling cutter.
- **Safe and reliable:** An integrated air cooling system protects the motor from overheating and ensures a long service life. Electronic overload protection switches the appliance off automatically if necessary.
- **Comfortable and user-friendly:** The clearly laid out control panel with rotary control and switches for direction of rotation (forwards/reverse) enables intuitive operation.
- **Compact and space-saving:** With its compact dimensions (L/W/H: 13 cm x 13.2 cm x 8.7 cm), the URAWA Super UP200 fits into any studio.
- **Flexible use:** Thanks to the selectable voltage (110V/220V), the device can be used worldwide.

The URAWA Super UP200 - your reliable partner for professional nail modelling.
